

Enterprise-grade AI analytics. Made easy.

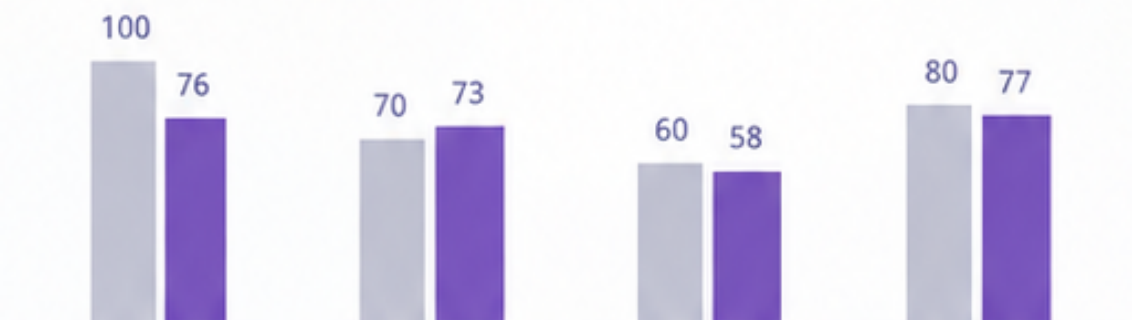

Bring your business data into the conversation.

Connect your data. Ask in plain English. Get clear answers, supporting evidence and practical next actions.

Why did sales decline last month?

REVENUE BY REGION

Illustrative example / sample units

WHAT CHANGED

-8.4%

Total revenue change

**North explains
most of the decline.**

SUGGESTED NEXT ACTION

Review stock availability and distributor coverage in North.

30-min first agent

Zero implementation cost

No SQL needed

See it live. Ask your first question.

Self-service Generative BI for teams that depend on data.

From connected data to a useful answer in around 30 minutes.

01

Connect

Bring in databases, files, APIs and business apps.

02

Build context

Review business terms, logic and the knowledge your agent uses.

03

Ask & act

Explore explanations, charts, drilldowns and actions in plain English.

Evidence, not just text

Answers can include explanations, charts, supporting tables and follow-up questions.

Business-aware answers

Teach agents your business terms, calculations and priorities, then review and refine them.

Enterprise-ready controls

Read-only queries, role-based access, encrypted credentials, usage visibility and audit activity.

Works with your data landscape

Connect familiar sources and create focused agents for specific teams or decision workflows.

Unlimited usage

Explore, investigate and ask follow-up questions without per-query usage limits.

Tenant-level isolation

Each tenant is isolated so organizational data, context and access stay separated.

FOR EVERY TEAM THAT DEPENDS ON DATA

Sales

Finance

Supply Chain

Operations

Leadership

Self-service for teams. Control for enterprises.
